Certificate of Suitability for Syndication.

At the request of Mr Scott Darby of Darby Racing, I examined the bay 2008 colt by Snitzel from Bandolera (branded nsh: cap over 3 conjoined diamonds, Osh: 6over 8) at the Magic Millions January Sale 2010.

At the time of examination he was in good condition and health and showed no symptoms of disease or injury. There were no signs of lameness when examined at the walk at the sales complex.

He appears to have a good even temperament.

Conformation of the limbs was good and he had good body shape and balance. There were no signs of swelling or effusion in any of the joints and no thickening or pain on palpation of the tendons and ligaments of the front legs.

Examination of the Radiographs of the colt in the x ray repository showed no significant lesions, and the colt was examined by endoscope after the sale and the report is attached.

Within the limits and confinements of the examination the colt is, in my opinion, a suitable subject to sell into syndication.

I, John Brian Crowley, Veterinary Surgeon in equine practice hereby declare that I have no financial interest and am not a shareholder in any of Darby Racing syndicated horses.
