### **Certificate of Suitability for Syndication.**

At the request of Mr Scott Darby of Darby Racing, I have today examined the 2007 bay filly by Stratum from Jargon (branded nsh: JT over lazy 2, Osh: 69 over 7).

The examination was limited to a visual inspection of the conformation of the horse, examination of the gait when led at the walk and trot. No other examinations or special tests were requested or utilized.

At the time of examination the filly was in good condition and health and showed no symptoms of disease or injury. There were no signs of lameness when examined at the walk and trot.

Conformation of the limbs was good and she had good body shape and balance. There were no signs of swelling or effusion in any of the joints and no thickening or pain on palpation of the tendons and ligaments of the front legs.

The filly had an endoscopic examination of the upper airways at the time of sale and there were no significant abnormalities.

Within the limits and confinements of the examination the filly is, in my opinion, a suitable subject for syndication purposes.

I, John Brian Crowley, Veterinary Surgeon in equine practice hereby declare that I have no financial interest and am not a shareholder in any of Darby Racing syndicated horses.
